EXPERIENCE

Data Engineering Intern

Pinterest | May 2017 – August 2017

- Save developers time by automating the often error prone setup of a data pipeline for new kafka topics
- Created a unified configuration file for all services included in the pipeline to prevent inconsistencies

HackNY Fellow + Software Engineering Intern

Skillsshare | June 2016 – August 2016

- Partnered with designer to develop front-end and back-end for new features on the web platform
- Improved the class recommendation algorithm
- Helped design and implement gamification for the web-application

Student Software Engineer

Rutgers University | June 2015 – December 2015

- Helped develop a backend to generate and grade quizzes for the ~10,000 students enrolled in a Chemistry or Mathematics class at Rutgers

Teaching Assistant

Rutgers University | September 2016 – May 2017

- Lead two classes of 15 students each in Introduction to Computer Science
- Conduct workshops, provide tutoring, and grade assignments

LCSR Tutor

Rutgers University | September 2015 – Present

- Tutor students in Data Structures, Computer Architecture, Systems Programming, and assist with debugging

RESEARCH

Rutgers University | January 2017 – Present

- Work with Desheng Zhang, to investigate trends in urban transportation in Shenzhen, China
- Use GPS data from public transportation vehicles to create visualizations of travel and create regression polynomials to predict future trends
- Create traffic simulations from taxi data using the python library SUMO

SKILLS

Languages: Python, Java, JavaScript, C, PHP, HTML, CSS, Scheme

Frontend: Backbone

Backend: Express, Flask, Yii

Database Systems: MySQL, MongoDB

Operating Systems: Linux (Debian)

GPU: CUDA

Version Control: Git

PROJECTS

Shrednought

- Unity3D game which uses a Fourier Transform library to decompose input signals from a real guitar into frequencies which map to different game controls

notes-cli

- Command line tool that utilizes a fuzzy string matching library to allow users to query their notes and return the top results

Tabbo

- Chrome extension that simplifies manipulating tabs

ShadowrealmVR

- Renders 3D models of Yu-Gi-Oh playing cards when placed on a disc using an RFID reader and Arduino

EXTRACURRICULARS

Volunteer

HackRU | September 2014 – Present

- Help organize HackRU, our biannual hackathon with over 1,000 attendees, by contacting sponsors, mentoring participants, and contributing to the backend for the website

Mentor

Rutgers USACS | September 2014 – Present

- Help my mentees to develop their skills in Computer Science by working on projects and attending hackathons

EDUCATION

B.A. Computer Science | Music Minor

Rutgers University | 2014 – 2018
